

Dual Monitor Mount NUC-MM2

The NUC-MM2 Dual Monitor Mount is a flexible but sturdy mount for two (2) computer monitors that frees up space and gives you an easily adjustable, flexible way to hang your monitors without mounting them to the wall.

Dual Mounting

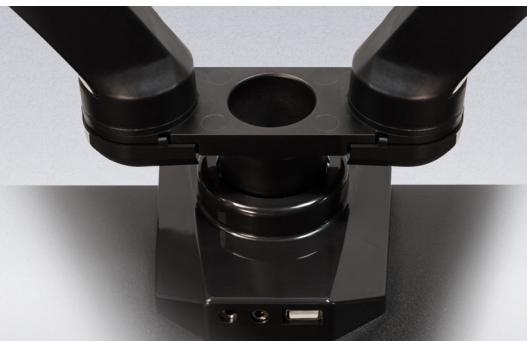

There are two mounting brackets that include a variety of mounting screws for different size monitors

Construction

The dual monitor mount is made of solid materials that are constructed to hold a variety of monitors.

Two Mounting Options

The dual monitor mount can be attached through an existing hole or clamped to the edge of a desk.

Fully Adjustable

The dual monitor mount gives the user a variety of ways to move and adjust the monitor to his/hers desired position.

Tension Control

Arm tension can be controlled using an allen wrench.
