

## Wood Powder Coating Finish Care Instructions

The wood powder coating finishing process which Ultimate Support uses involves applying powder coating finishes to medium density fiberboard (MDF).

After unpacking and assembling your Nucleus Desk, you may notice small marks from packaging materials in certain light. Using a microfiber cloth with Lemon Pledge, these can be easily removed.

For normal cleaning, wash with a soft cloth and a mixture of a mild detergent and warm water; wipe dry with a clean, soft cloth.

**Avoid the following types of cleaning agents:** Lysol cleaners, abrasive cleaners (Soft Scrub, Comet, Windex, etc.), and acetone based cleaners. Citrus type cleaners are also not recommended as they can leave behind oily films that are difficult to remove.

For spot cleaning, spray with Lemon Pledge, and wipe until dry with a clean, soft cloth.

### **Please handle with care!**

To avoid damage to wood powder coating finish, please follow these precautions:

- Do not drag across carpet or floor.
- Do not stand on the surface.
- Use care when using sharp objects near the surface.
