

## IQ-2000

*IQ Series X-style Keyboard Stand with Patented Memory Lock System, Six Height Settings, Stabilizing End Caps, and Double-braced Tubing – 150 lbs. Capacity*

### Unprecedented Strength in a Lightweight Design

The IQ-2000 supports keyboards, synthesizers, and workstations up to 150 lbs. with unheard of strength and stability, while maintaining the convenient, lightweight X-style format that gigging keyboardists demand. With thick, double-braced tubing, heavy-duty bolting, a generous upper keyboard shelf, and a no-glare matte finish, the IQ-2000 is the cure for the common X-style stand, equally at home onstage, at jams, and in the studio.

### Patented Memory Lock System

Equipped with the IQ Series' patented Memory Lock System, the IQ-2000 offers a set-it-once solution that saves gigging and on-the-go keyboardists time and energy. After initially choosing a preferred height position, the Memory Lock opens the stand to the desired height every time. Keyboardists need only to lift and place their instruments once.

### Off-set Bracing System for Maximum Knee Room

More than offering six height positions that comfortably accommodate a range of sitting and standing positions, the IQ-2000 features an inventive off-set bracing system. This design feature gives keyboardists more knee room than any other double-braced stand, ensuring that the stand is out of the way and that only the keyboard is in focus during performances.

### Stabilizing End Caps Overcome Uneven Surfaces

The IQ-2000's integrated stabilizing system accounts for potentially uneven surfaces at future gig or jam locations and effectively combats potentially instrument-threatening rocks and wobbles. Located on the upper and lower tubes, two rubberized end caps easily rotate, revealing incremental thicknesses to correct the problem. In addition, thick rubber sleeves secure the keyboard on the upper tubes, while keeping the IQ-2000 firmly in place.

Double-braced design provides trusted stability when supporting loads up to 150 lbs.

Patented 6-position memory lock opens stand to the desired height setting every time

Offset bracing system provides maximum knee room

Adjusting rubberized end caps help combat wobble from uneven surfaces

## IQ-2000 SPECS

- IQ-2000 #13241— black
- Height 26.5" - 36" (673 mm - 914 mm)
- Width 18.5" - 33" (469 mm - 838 mm)
- Weight 15 lbs. (6.8 kg)
- Load capacity 150 lbs. (68.2 kg) distributed

**IQ-200**  
*2nd tier for IQ-2000 & IQ-1000.*

- IQ-200 #13360—black
- Width adjustable

## IQ-SERIES

The IQ Series redefines the X-style keyboard stand, bringing a new level of stability and innovation to the lightweight, gigging-minded design. Offering a range of height settings for sitting-to-standing playing comfort, the IQ-1000, IQ-2000, and IQ-3000 all feature Ultimate Support's patented Memory Lock system and unique stabilizing end caps, giving keyboardists timesaving onstage luxuries along with peace of mind. IQ Series stands hold true to Ultimate Support's twofold commitment – providing uncompromising instrument stability while remaining at the forefront of musician-centric, innovative design – and are ideal for supporting everything from lightweight synthesizers and MIDI controllers to the heaviest of professional keyboard workstations.
