

HyperStation QR

3-in-1 Professional Laptop Stand

QuickRelease™ Center Post

What makes the HyperStation QR different from all other laptop stands is the patented QuickRelease™ center post, which gives you three stand possibilities. Quickly and easily, you can release the support arms and center post of the HyperStation QR and mount it to a mic stand or one of the Ultimate Support APEX® AX-48 Pro keyboard stands!

Portable Production

HyperStation QR is designed to go wherever your music takes you. While sturdy enough to safely hold your laptop and other small electronics, it folds up as one piece and fits in a backpack! Fold it up when you're on the go; set it up when you're ready to play.

Secure and Sturdy

Don't let the sleek styling fool you, this is not a flimsy, plastic stand! HyperStation QR is constructed from die-cast aluminum making it incredibly sturdy and surprisingly light. HyperStation QR features patent-pending technology that truly locks it upright when you're ready to make music. Plus, you don't have to worry about your laptop falling off. Simply place your laptop at whatever angle suits your need and secure it in place with the telescoping, non-marring arm stops!

Second Tier and More!

The modern musician and DJ artist carries additional hard drives, MP3 players, USB hubs, audio interfaces, and other computer accessories with them to each and every gig. HyperStation QR has you covered with a second tier that is height adjustable and fitted with ports for venting. HyperStation also ships with a handy carrying pouch for protective transport and cable management clips to keep cables out of the way.

HyperStation QR folds flat for easy transport AND includes a carrying bag!

HyperStation QR in standing position.

With included T-stand adapter.

Mounted on microphone stand (5/8" thread).

HyperStation QR on top an AX-48 Pro keyboard stand.
