

LT-99B

LT Series Multi-tiered, Heavy-duty, Extra Tall Lighting Tree with TeleLock® Lift-assist Technology

TeleLock® Lift-assist Stand

The LT-99B is one of the easiest lighting tree stands to use thanks to its patented TeleLock collar. Set the TeleLock collar to either the "Raise" or "Lower" setting and the Auto-lock technology provides just the right amount of resistance to allow you to raise or lower the lighting tree while locking the tube in place as you go. And, the fail-safe internal friction device won't allow your lighting gear to slide down once it's in the "Lock" position. It's like having four support built into your lighting tree stand!

LTV-24B Vertical Extension

The LTV-24B is a 24-inch vertical extension tube that fits on top of the LT-99. While the tripod stand is plenty tall on its own, by adding the LTV-24B to the stand, we make it plenty tall for all your lighting needs! With the addition of the LTB-48B t-style lighting crossbar and LTB-24B, you have a professional, sturdy lighting tree.

LTB-48B T-style Lighting Crossbar

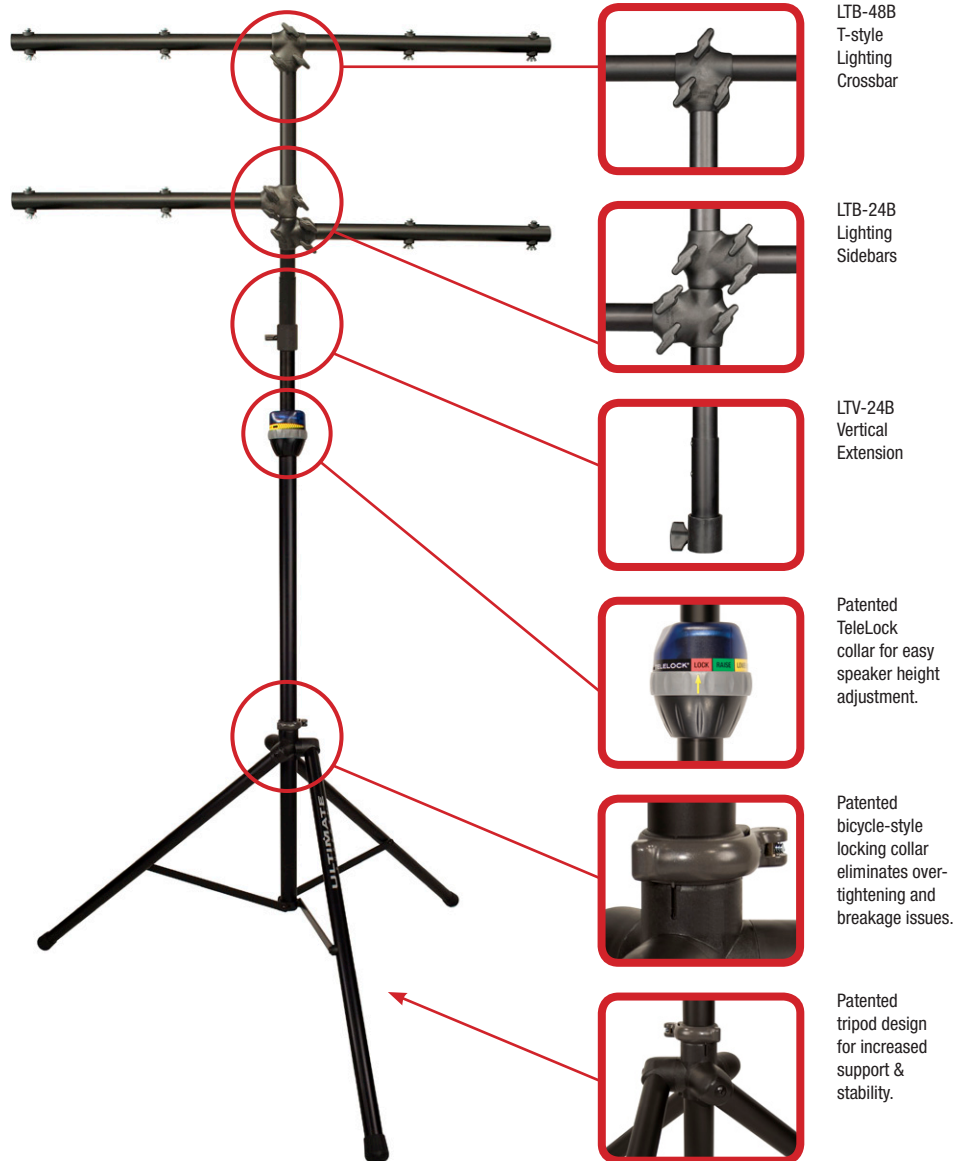

The LTB-48B is a 48" T-style lighting crossbar that features four pre-drilled holes for mounting your lighting equipment to - we've even included mounting hardware to get you started. It's constructed with thick-walled aluminum so while it's amazingly light, it's rated for use with C-clamps (not included). The LTB-48B also includes two UNF-150 mounting brackets for mounting lighting equipment, such as dimmer packs, to the lighting tree.

LTB-24B Lighting Sidebars

The LTB-24B is a great and flexible way to add more lights to your Ultimate Support lighting tree. It features two 24" sidebars that mount to the LTV-24B Vertical Extension. The two sidebars are height-adjustable, so you can mount them where you need them on the pole for maximum flexibility. Each LTB-24B sidebar features two pre-drilled holes for mounting your lighting equipment to (mounting hardware included).

Over-sized Heavy Wall Aluminum Tubing

The entire stand (legs, mast, and telescoping tube) uses oversized, heavy-walled aluminum tubing for durability, functionality, and weight savings. The LT-88B will not rust or corrode (thanks to its architectural anodized finish), is very smooth to operate, and is extraordinarily strong yet lightweight.

LT-99B SPECS

- LT-99B #17347 — black
- Included Components: TS-99B aluminum tripod stand, LTV-24B 24" Vertical Extension, LTB-48B 48" T-style Lighting Crossbar, LTB-24B 24" Lighting Sidebars (Qty: 2)
