

AX-48 PRO MIC BOOM

Microphone Boom Arm Adapter and Ulti-Boom for Use with AX-48 Pro Keyboard Stand

Keyboard Stand and Mic Stand - The Same Stand!

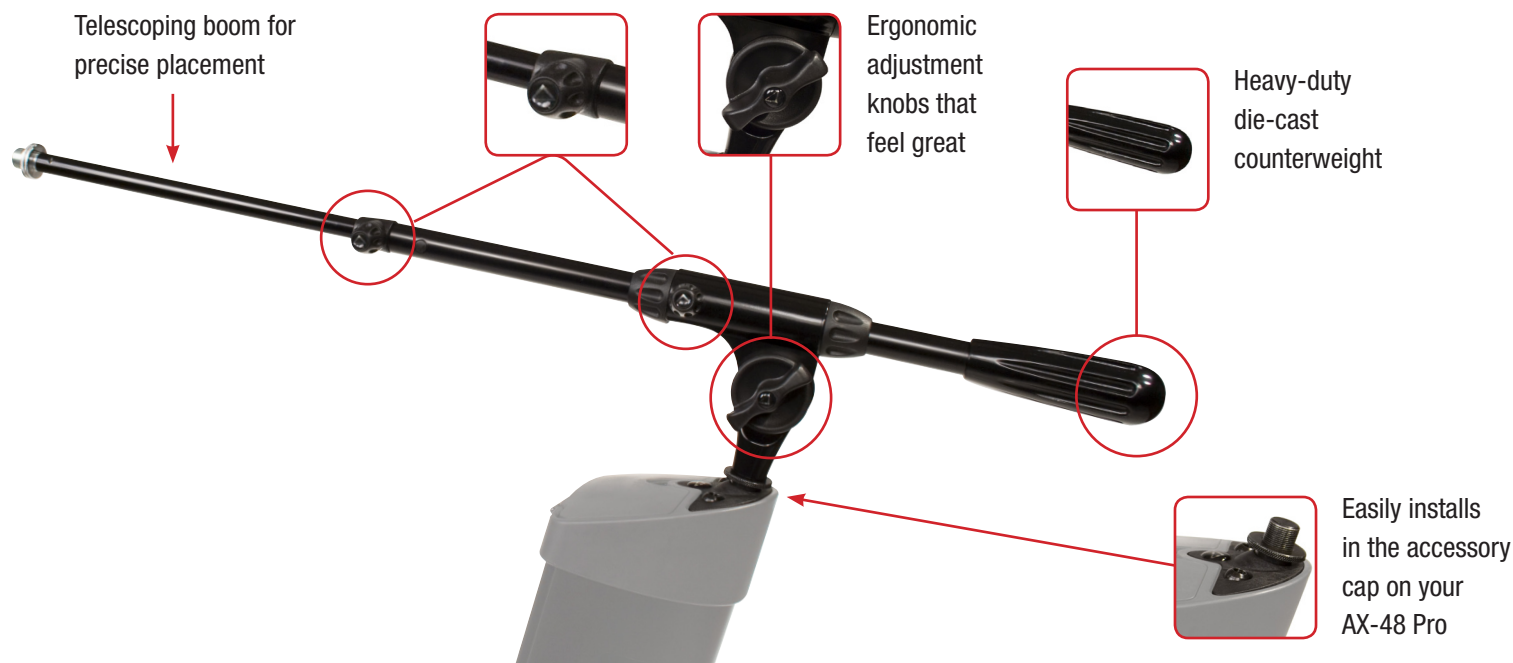

We know how difficult it can be to perfectly place a microphone when playing keyboards - especially if you're playing two keyboards. The AX-48 Pro Mic Boom is a great addition to the APEX AX-48 Pro keyboard stand. Combine the two and you have a legendary keyboard stand with two tiers and one of the finest telescoping mic stands ever designed - all in the same stand!

Easy to Install

You'll be able to add this mic boom to your APEX AX-48 Pro quickly and easily. It takes just minutes to install the AX-48 Pro Mic Boom. Simply remove the accessory cap on top, pop in the adapter, tighten the two bolts using the included Allen wrench, and attach the Ulti-Boom boom arm. It really is that easy!

Ulti-Boom Telescoping Boom Arm Included

When it came time to design a new generation of microphone boom arms, Ultimate Support decided to throw known conventions out the window and give way to innovation. The Ulti-Boom mic boom arm features a heavy-duty, die-cast counterweight, ergonomic adjustment knobs that feel great in your hands, and lightweight (yet durable) anodized aluminum tubing with internal glides that ensure fast, smooth, noise-free adjustment. Ulti-Boom by Ultimate Support has redefined how professional boom arms should perform.
