

IQ-3000

IQ Series X-style Keyboard Stand with Patented Memory Lock System, Nine Height Settings, Stabilizing End Caps, and Extra-strength Tubing – 300 lbs. Capacity

Crafted for Superior Strength and Stability

From the thick, oversized tubing to the heavy-duty metal height adjuster, each component of the IQ-3000 was carefully selected to give keyboardists maximum strength and stability. This top-caliber IQ Series stand effortlessly supports the largest, heaviest keyboards, synthesizers, and professional workstations, securely holding loads up to 300 lbs.

Patented Memory Lock System

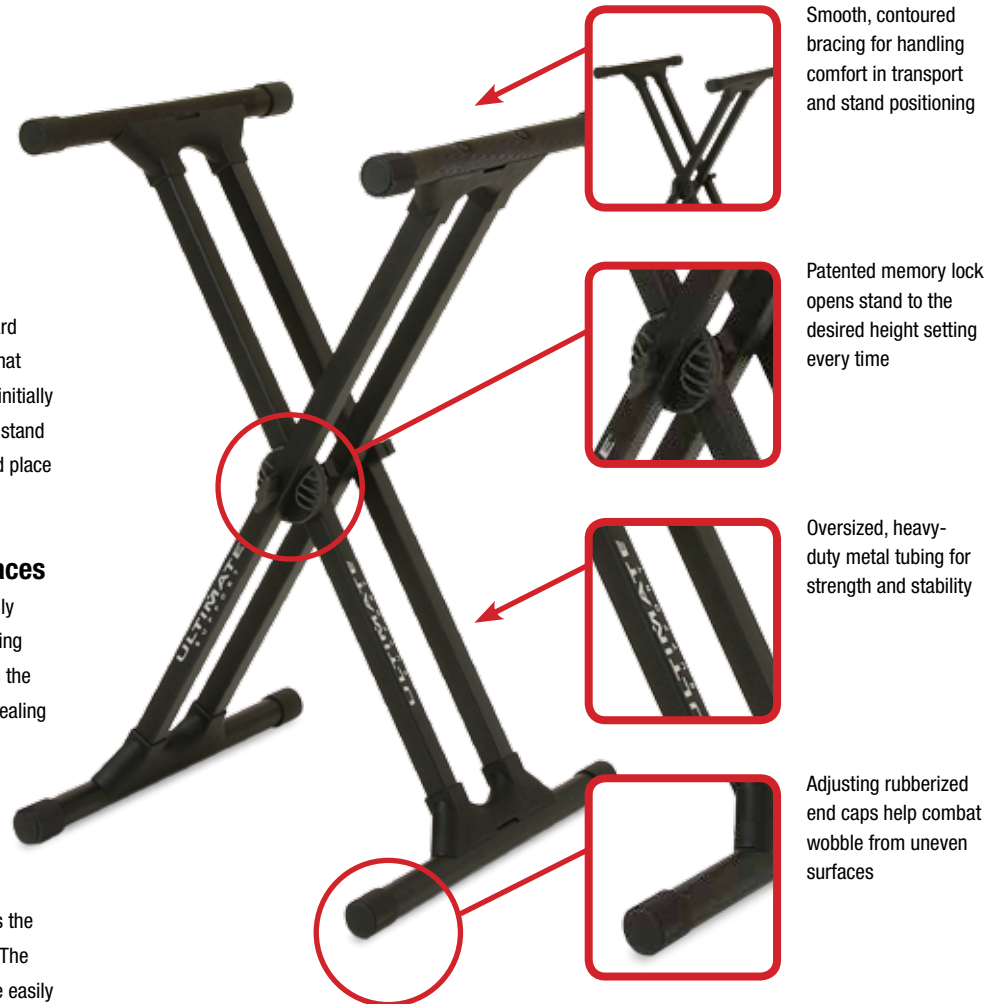

Equipped with the original patented Memory Lock System, standard on all IQ Series stands, the IQ-3000 offers a set-it-once solution that saves gigging and on-the-go keyboardists time and energy. After initially choosing a preferred height position, the Memory Lock opens the stand to the desired height every time. Keyboardists need only to lift and place their heavy instruments once.

Stabilizing End Caps Overcome Uneven Surfaces

The IQ-3000's integrated stabilizing system accounts for potentially uneven surfaces at future gig or jam locations, effectively combating potentially instrument-threatening rocks and wobbles. Located on the upper and lower tubes, two rubberized end caps easily rotate, revealing incremental thicknesses to correct the problem. There are also thick rubber sleeves that secure the instrument on the upper tubes, while keeping the IQ-3000 firmly in place.

Nine Height Positions for Playing Comfort

To comfortably accommodate all playing styles, the IQ 3000 offers the widest selection of secure height settings available on any stand. The nine height positions range from sitting to standing levels, and are easily chosen by loosening the memory lock knob, then adjusting the rugged, ratcheted metal adjustment plates. Tightening the knob cranks the plates securely together, eliminating any chance of height setting slippage.

IQ-3000 SPECS

- IQ-3000 #14036— black
- Height 28.75" - 37" (730 mm - 940 mm)
- Width (changes in relationship to height setting)
22" - 34" (559 mm - 864 mm)
- Weight 22 lbs. (10 kg)
- Load capacity 300 lbs. (136.1 kg)

IQ-SERIES

The IQ Series redefines the X-style keyboard stand, bringing a new level of stability and innovation to the lightweight, gigging-minded design. Offering a range of height settings for sitting-to-standing playing comfort, the IQ-1000, IQ-2000, and IQ-3000 all feature Ultimate Support's patented Memory Lock system and unique stabilizing end caps, giving keyboardists timesaving onstage luxuries along with peace of mind. IQ Series stands hold true to Ultimate Support's twofold commitment – providing uncompromising instrument stability while remaining at the forefront of musician-centric, innovative design – and are ideal for supporting everything from lightweight synthesizers and MIDI controllers to the heaviest of professional keyboard workstations.
