

## AMP-150 GENESIS AMP STAND

ITEM #13464

Portable amp stand for amplifiers weighing up to 75 lbs.

### FEATURES

Optimal Volume - 3 tilt positions direct the amp's sound to your ears.

Leg Lock - Legs lock open and closed for worry-free stability of up to 75 lbs.

True Portability - one-piece stand quickly folds into a 3.5" x 18" unit.

Mic Boom attachment - threaded top tube for mic boom attachment (sold separately); no need to carry an extra mic stand.

Limited Lifetime Warranty - constructed of high quality materials, backed by our award-winning customer support.

### APPLICATIONS

Use with most amplifier cabinets weighing up to 75 lbs.

### ADDITIONAL INFORMATION

Are you experiencing hearing loss or do your band members complain about your volume? Here's a simple solution — get your amp on an Ultimate Support Amp Stand. Use one of the stand's 3 tilt positions to tip your amp back and face it toward you, allowing you to hear high frequencies at much lower volume levels. In addition, your sound guy will have less vocal mic bleed and better control of the mix. End result: your band will stop threatening to unplug you!
